## **CLAIM AMENDMENTS**

1. (Currently Amended) A computer-implemented method for the purchase and sale of products by purchasers and sellers, comprising:

storing in computer storage information on a product for sale by a seller that owns the product for sale, the information including, an identification of a the manufacturer of the product;

determining the product was purchased in a transaction between a purchaser and [[a]] the seller, wherein the seller is not also the manufacturer of the purchased product;

determining whether the seller is the manufacturer of the purchased product;

identifying by the computer a computer incentive program to apply to the purchased product;

calculating by the computer a manufacturer incentive to <u>compensate</u> the manufacturer of the purchased product using the identified computer incentive program; and

distributing the manufacturer incentive to the manufacturer only if the manufacturer was not the seller of the product in the transaction.

- 2. (Original) The computer-implemented process of claim 1, wherein the incentive is a percentage of a purchase price of the purchased product.
- 3. (Original) The computer-implemented process of claim 1, wherein the incentive is a percentage of a profit from the sale of the product.
- 4. (Previously Presented) The computer-implemented process of claim 1, wherein the stored information includes a characteristic of the product, and wherein the computer incentive program is identified based, at least in part, on the characteristic of the purchased product.
- 5. (Previously Presented) The computer-implemented process of claim 4, wherein the characteristic is a product category.
- 6. (Previously Presented) The computer-implemented process of claim 4, wherein the characteristic is a product name.

- 7. (Previously Presented) The computer-implemented process of claim 4, wherein the characteristic is a product family.
- 8. (Previously Presented) The computer-implemented process of claim 4, wherein the characteristic is an identification of an equivalent product.
- 9. (Previously Presented) The computer-implemented process of claim 4, wherein the characteristic is a product date code.
- 10. (Cancelled)
- 11. (Currently Amended) The computer-implemented process of claim 10 further comprising storing in computer storage a plurality of computer incentive programs; and assigning a priority to each of the selecting by said-computer a one of said plurality of computer incentive programs having a priority for calculating the incentive.
- 12. (Original) The computer-implemented process of claim 1, the incentive is based, in part, on a sale transaction.
- 13. (Cancelled)
- 14. (Cancelled)
- 15. (Currently Amended) A computer-implemented method for enabling purchasers to buy products that are for sale, comprising:

listing in computer storage products that are for sale;

listing in computer storage <u>a the</u> seller of the products, <u>wherein the seller owns the</u> <u>products</u>;

listing in computer storage <u>a</u> the manufacturer of the products, wherein the manufacturer is different than the seller;

determining by the computer whether the seller of a purchased product is the manufacturer of the purchased product;

identifying by the computer an computer incentive program[[s]] to apply to a purchased product;

calculating by the computer a manufacturer incentive to the manufacturer of the purchased product using the identified computer incentive program; and

distributing the manufacturer incentive to the manufacturer only if the manufacturer was not the seller of the product.

- 16. (Currently Amended) The computer-implemented process of claim 15 wherein the incentive is a percentage of <u>a</u> the purchase price of the purchased product.
- 17. (Currently Amended) The computer-implemented process of claim 15 wherein the incentive is a percentage of <u>a the</u> profit from the sale of the purchased product.
- 18. (Previously Presented) The computer-implemented process of claim 15 further comprising listing in computer storage a characteristic associated with each product and wherein identifying the incentive program is based at least in part on the characteristic of the purchased product.
- 19. (Previously Presented) The computer-implemented process of claim 18 wherein the product characteristic is a product category.
- 20. (Previously Presented) The computer-implemented process of claim 18 wherein the product characteristic is a product name.
- 21. (Previously Presented) The computer-implemented process of claim 18 wherein the product characteristic is a product family.
- 22. (Previously Presented) The computer-implemented process of claim 18 wherein the product characteristic is an equivalent product.

- 23. (Previously Presented) The computer-implemented process of claim 18 wherein the product characteristic is a product date code.
- 24. (Currently Amended) The computer-implemented process of claim 15 <u>further comprising</u> providing a plurality of computer incentive programs; and assigning a wherein there are a <u>plurality of computer incentive programs to calculate the incentive, each such program having an individual</u> priority to <u>each of</u> the incentive programs.
- 25. (Original) The computer-implemented process of claim 24 including the step of determining by computer comparison the computer incentive program having the highest priority for calculating the incentive.
- 26. (Original) The computer-implemented process of claim 15, the incentive is based, in part, on a sale transaction.
- 27. (Currently Amended) The computer-implemented process of claim 24 26 including the step of adjusting the incentive as a function of the assigned priority a plurality of factors.
- 28. (Currently Amended) The computer-implemented process of claim 24 27 including the step of adjusting the incentive as a function of wherein the plurality of factors includes the type of transaction.
- 29. (Currently Amended) A computer system for tracking transactions of <u>transferring the</u> ownership of goods between parties that are not themselves the manufacturer of the goods and calculating <u>an incentive[[s]]</u> to be paid to the manufacturer based on those transactions and distributing <u>the incentive[[s]]</u> to the manufacturer based on the manufacturer not being the seller of the goods.
- 30. (Currently Amended) The computer system of claim 29 wherein the incentive is a percentage of the revenue from the transaction.

- 31. (Original) The computer system of claim 30 wherein the percentage of revenue is calculated using a purchase price for the transaction that is set by auction.
- 32. (Currently Amended) The computer system of claim 29 wherein the incentive is a percentage of the a profit from the transaction.
- 33. (Original) The computer system of claim 32 in which the percentage from of the profit is calculated, in part, using a purchase price for the transaction that is set by auction.
- 34. (Original) The computer system of claim 29 wherein the incentive is a fixed fee.
- 35. (Original) The computer system of claim 29 wherein the incentive is a discount.
- 36. (Currently Amended) A computer program, stored on a computer readable medium, that when read by a computer, causes the computer to:

store in computer storage a listing of products that are for sale;

store in computer storage an identification of the seller an owner of the products;

store in computer storage <u>a</u> the manufacturer of the products, wherein the manufacturer is not the owner;

determining by the computer whether the seller of a purchased product is the manufacturer of the purchased product;

identify a computer incentive program to apply to the purchased product a product purchased in a transaction between the owner of the products and a purchaser;

calculate an manufacturer incentive to the manufacturer of the purchased product using the identified computer incentive program; and

distribute the manufacturer incentive to the manufacturer enly if the seller was not the manufacturer.

37. (Currently Amended) The computer program of claim 36 wherein the incentive is calculated as <u>a percentage</u> of the revenue from the transaction.

- 38. (Original) The computer program of claim 36 wherein the incentive is calculated using a price set by auction.
- 39. (Currently Amended) The computer program of claim 36 wherein the incentive is calculated as a percentage of the a profit from the transaction.
- 40. (Original) The computer program of claim 36 wherein the computer calculation function calculates the incentive using a price set by auction.
- 41. (Currently Amended) The computer program of process of claim 36 wherein the incentive is a fixed fee.
- 42. (Currently Amended) The computer <u>program implemented process</u> of claim 36 wherein the incentive is a discount.
